

*Air conditioners and other cooling equipment*

# safety tips

Hot weather brings increased use of air conditioners. Contact with electric current from air conditioners accounts for a significant number of electrocutions and electrical injuries each year.

The Electric Safety Foundation International (ESFI) recommends that you always contact a qualified, licensed electrician to perform any electrical work in your home, including the installation and services of air conditioning and other cooling equipment.

- Keep safety in mind when selecting cooling equipment for your home.
- Have a qualified, licensed electrician install and service any electrical equipment in your home.
- Have electric-powered equipment inspected and maintained regularly for safety.
- Make sure your equipment has the label showing that it is listed by a recognized testing laboratory.
